Subject: PI's and amps

Well I am about halfway done with my first set of do it yourself speakers, a pair of 2 PI. I am considering purchasing a small tube amp to run them, I would really like something pre-assembled. I think the Norh SE9 looks nice for the price. I am wondering if any of you have used that amp or know of anything else small and in that price range that would make my pair of 2 PI sound good. Thanks.
