Kewl, I think I'll go with the SD-450 N then. In Australia, they are very well priced (which is nice for a change!), at AU\$215, which converts to US\$132. In the US I believe they cost a fair amount more. I'll be sure to let you know how it sounds! Thanks for your advice! Adrian! I'm going to be buying mine from [www.cannonsound.com.au](http://www.cannonsound.com.au) but if you are not in Australia then [www.loudspeakersplus.com](http://www.loudspeakersplus.com) sells them, also [www.speakercity.com](http://www.speakercity.com) but they don't have this model, they could probably get it in though.
