---

Hi all! Was wondering if anyone is bringing stuff to sell/trade. I'm interested in doing something with my JBL 4648-8A's. I've had them for a couple of years now and just don't have the room to implement them the way I'd planned. I would love to, but just don't have the size room those monsters need to breath. They are absolutely new and I still have them wrapped in the original cardboard, however I cut the bottom out of the box so I could use the original box as a big removable cover. I'd love to trade for parts for putting together Pro 7 corner horns, including JBL 2226H woofers, 2426H comp. drivers, 2370 horns, as well as any Edgar saladbowls or SB baby grands, Altec horns, woofers, comp drivers... Would also love TAD parts but most people are keeping those! Would also consider trades on tube amps, single ended and push pull, tube phono preamps, turntables, etc. Let me know if you have anything you'd like to offer in a trade. I'd considered parting the 4648 cabinets in the past and selling the woofers because they are shippable. If you have a truck available I could haul these to Lima and offer the whole BIG package. See you all in a couple weeks!! Jerrod
