This is non glamour shot of a 7 Pi that just got finished up. It's a little more than your average 7 Pi. It has a JBL 18" in the corner horn, a JBL 10" (stark) on the front, and still a third JBL compression driver for the top horn. The sound is really amazing. The cabinet is finished with Chilean Laurel burl with Satin wood surrounding the 4 piece burl matches. The trimmings are walnut as for the rear corner portions. The horns for the top of these are walnut. The maple one is just for the picture. They do indeed sound great.Bill
