Hi Ron,I'm not saying you "should" cross the horns over any lower than what your using. I was just saying you can cross down to 800 if you wanted to. I Like using a 1200hz-1600hz crossover myself. You'll find the horns have a real nice top end that is nice and natural, and not a phony ringing sound. I put my 811's in the basment too, then I sold them! Did you find me a 1505 yet?! Bill
