Hi Wayne! So it's 7:30am and I'm sittin' here in the shop listening to Bonnie Raitt's "Luck of the Draw" - left channel only. Woo hoo! Surround sound my as*. Get the first one or two channels right and you just won't care about the other nonsense. If only concerts sounded this good. ;-)
Absolutely! Tend to do that anyway, as does John LaPaire. I keep a running log of meeting notes and photos on my TriodeandCo.com site, although I've missed the last two (unthinkable!), so I really need help from the guys who were there to fill it in. I'll be bringing the TAD/JBL's (duh!), Audio Note CD Transport Two, DAC 3.1x (or the brandy new 2.1x Balanced, if it gets here soon!) M5 pre, Quest Silver Sig amps, WannaGlows and Bill's Conqueror amp (look out, Rochester!) Pretty much the same toys I had at Lima, except diff speaks, and I'll leave the 'table home - host Steve Culton's tweaked Rega P3 will do the honors! Hopefully others will jump in with their intended goodies! You can also follow the link below (bottom right corner of the page for Bot stuff):
Keep your ears and your mind open.
