Hey everyone!! just found out a clearance sale, where a pair of P.Audio PA-D45 compression drivers are goin, \$160/pair, and only one pair available! They retail AU\$225 in australia. Anyone used it before?! Link is at http://www.paudiosystem.com/products/db_product_2_5_pa-d45.htm if anyone can give any thoughts on this. Could be a chance to get a great deal for a pair of them for under the price of a single unit, or it could be my chance to blow money on a POS
:PThanks!Adrian
