I have Oris 150s with Lambda TD15Xs in 8 cu ft boxes with 2 700 gmPRs in each box. I am very happy with the bass since I had the Sony 9000 upgraded with VSE Level II mods. The bass is run by an AVA Omega III 240 and will go very low and be tight and distinct. A friend called it "hard bass". Lambda is going out of business so that is something to consider. nilemi
