Still listening to my 3677s/811b/2226J kludges. The Towers may be finished sometime in 2008. But I got a pair of the Ksn piezos to try as ambience tweets on the towers and hooked them up to the Altecs just now. They're sitting on the pillow behind the bells of the horns and firing up. I can hear the greater high freq extensions as airier and the image has changed. Suppose there will be some break in issues, but,I like it!
