BTW, I have replaced my Selenium 15" with JBL 2226. It is very hard to tell the difference. The Seleniums have gone in my altec A-7's and sound great (with a little modifications to the a-7 internal cabinet). Wayne, Could you please email me Pi 4 and Pi 10 plans aligned for JBL drivers. Building a new, very large home theater. [brianjefferys@yahoo.com](mailto:brianjefferys@yahoo.com) thx.
