> If I play real loud I can still hear it, but it isn't pretty from most mass production recordings and players what do you mean by this? the sound on the recording isn't great to begin with? I can still hear the TV whine, but i have been to my fare share of concerts 3 Tool, Red Hot Chili Peppers, Les Clay Pool, Incubus. I am just worried that i will be missing the high notes of Gilmore and Hendrix. thanks for your quick replies I guess i will still have to think about it, and oh yeah that whole money issue :)
