I'm a mac-o-phile, and I don't know of anything either. Doesn't mean there's nothing out there, but I haven't run across it yet. There are a couple of excel spreadsheets you may or may not find useful: Xlbox.xls Xlbaffle.xls Sealed Box Calcs.load.xls (for tube current/loading IIRC) I downloaded all these off the web- I did not write them, I merely benefit from other's generosity. If you can't find them, email me and I'll send them to you. My theater 4 pi's are sounding great Wayne! I rarely post, cause there's not too much to say about them besides that they are the best sounding speakers I've ever had. cheers, Jason
