Hi, I'm new to Pi Speaker Forum and haven't received my confirmation by mail yet, however, I wanted to tell you of my experience w/Madison Speakers. They make their own drivers and they are quality! The company is going through a transition now, however, their speaker designs, components, and dedication to quality is very high! They cut-out the middle man and savings are spectacular! I own 2 of their 10" bass drivers and they are superb! Just because they are made in Loveland, CO don't discount their high quality! Thanks for the opportunity to sound off about a quality company and drivers I have been dealing with for many years!Michael A. Collins
