Hi Wayne, Thanks for your JBL 2245 suggestion. Is there a little cheaper Eminance alternative ? Or can used 2245's be found. Also, the Pi 4's already take up alot of room, so I'd like as small a solution as possible. Right now I'm using a pair of powered 10" subwoofers that go under my BESL series 5 monitors (Bamberg engineering sound labs).Not bad sounding but alittle sloppy sometimes. And yes, I've corrected the tweeter crossover circuit. I forgot, it's been awhile. My Pi 4 and Parabee combo sounds wonderful and keeps sounding better as things breakin. Tom
