Old Colony is the book publishing division of _aX_. AndI've subscribed to _audioXpress for 4 years or so. it is clebrating its 35 anniversary. So I have seen the Old Colony book list before. But in all these years I have not seen much about what might be a competitive program to the work of Martin King. Auspurger isreferred to in technical articles, but an implementation of adesign program, to my knowledge, was never written up in _aX_. I would have to check my old issues. _aX_ is now availableon cd rom for subscribers to the print version.   BTW Old Colony is also reprinting the complete monthlypublication called ... name escapes me.... in 2 volumes from the '70s. This magazine had all the breakthrough work for the emergingaudiophile community. Anyone can get the Old Colony cataloge from a request towww.custserve@audioXpress.com.
