I swapped out the 2226H for 2235H in my 4P1 Pro cabinet which is approx. 70L (with appropriate crossover changes). The 2235's have a ton more bass than the 2226's even in this than optimal alighment. IMO they have a bit warmer midrange than the 2226, not that I don't don't think the 26's are great drivers cause they are but they seem to need to need a bit more volume than I want, to really shine. Kelly
