Have you ever seen a plasma tweeter? I'm not really interested in using them for a particular design, but they are certainly a curiosity. Plasma tweeters use a modulated Tesla coil to literally ionize the air enough to cause audible pressure changes. Check out these links: [Roger Russell's Ionophone Loudspeaker History Page](#) [Rudistor Sound Lab Plasma Tweeters](#) [Carl Willis' Plasma Tweeters](#) [Heinrich Ulmann's Plasma Tweeters](#) [Colin Joye's Ion Tweeters](#) [Colin Joye's Plasma Tweeters](#)
