Yes i have to power the 350watt amp from the first,with no Line out,only speaker outBut then i just rememberd-i have headphone output-is this more closer to line level?Id avoid it too-but my mini system is really crap,and i cant afford another good amplifier yet,i had to quit my job as ive got a virus,my platelets are low ,so cant work at night anymore,too shattered. i can get another dayjob but earn less Cheers
