,not really :-Pmy first conceptautocad is for later..paper for now.it looks like a LABSUB but with extra bit.goes lower too.i think making a nice basshorn that is ideal for my usage,is the best idea-making my own-i could make the mouth 1.5metres wide even < assuming 45cm height>would be 50% longer than pictured.i imagine i could spend 199hours doing this :-Pcya!mike * no compromise* port.e :-)
