Is there a way to make a 16-ohm One Pi? Different drivers, redesigned crossover perhaps? Reason I ask is that I would like to try Bruce Rosenblit's (transcendentsound.com) new SET OTL (shipping in December 2003) which puts out a meager 1.5 watts at 8 ohms, but a whopping 3 watts at 16 ohms! (I am not affiliated at all with Transcendent.)Thanks,Al Lau
