What's your budget and amplification? I would rather stay South of 1K.I have an AKSA 55w/ch that has killer bass control as well as an old Carver with ~ 150w/chDoes your room have corners suitable for cornerhorn loading at one of the 15' ends? Yes.If so, I'd be inclined to put JBL 2241's

recommend and why?Also any reason for a 18" as against a 15"? Is it because the room is so large?When i think of a 18" its huge. I have to put my bigscreen tv between the corners as well. I should have told you that before.ThanksAndrew
