What's your budget and amplification? I would rather stay South of 1K. I have an AKSA 55w/ch that has killer bass control as well as an old Carver with ~ 150w/ch. Does your room have corners suitable for cornerhorn loading at one of the 15' ends? Yes. If so, I'd be inclined to put JBL 2241's

recommend and why? Also any reason for a 18" as against a 15"? Is it because the room is so large? When I think of a 18" it's huge. I have to put my bigscreen tv between the corners as well. I should have told you that before. Thanks Andrew
