PiAlign recommends 4.0ft<sup>3</sup> tuned to 50Hz using a rectangular 5.8" x 10.3" port that's 9.2" long.

also, providing an EBS alignment having a -3dB shelf from 40Hz-100Hz. Response is nice and flat in the shelved region with a slight 3dB rise through the 100Hz - 200Hz octave. Considering
