The center channel I made uses two Fostex FE127's (plus a KSN1038).I'm a sucker for highs (or my hearing is crap after 100Ws ofTraynor amp in my bedroom when I was a teen. Nah. Couldn't be that.).Anyway, I'm really impressed with the Foxtex drivers. Not cheap,but sound pretty nice. The first Fostex pair I made were TQWTs withsome cheap RS piezos. Those are FE207s 8". No complaints there.I have another pair I ordered by accident, really. Haven't madeboxes for those yet. Those are FE167's.Chris
