Sounds like fun! What exactly does that Qms virtual circuit calculator do? I couldn't figure it out from the details you gave. I'm interested to know what you are going to do for the midrange horns. Are they going to be larger drivers like ~10-12" or smaller ones like the Alpha 6's in my midrange horns? Is it going to be a horn which people will have to construct or one that you can buy? Adrian
