Hi Ron! I had thought about using the 2226J's in a Seven Pi Corner horn. My main concern was the Ella's opt's being optimized for 4/8 ohms. I read today that the Ella is available with 8/16 ohm taps. This may make a really good combo. I think I may take your advice. How are you liking those round tractix? How do they compare to a 2370 or 511/811? Thanks, Jerrod
