I am within a few weeks of starting my Theater 4 Pi speaker project. This will be my first attempt at speaker building. Needless to say, I am still a little unsure of what I need. A friend on mine is going to cut the MDF for me. Other than that, I am on my own. Here's a list of what I plan to buy. Any help and/or suggestions would be most welcome:(2) Theater 4 Pi speaker kitsPorter-Cable 690 routerCarbite router bit setJasper Circle Jig model 200 3/4" MDF1"x 2" bracing (Dumb question: What's the best way to attach the bracing to the MDF?) Saw horsesElmers wood glueSquareVarious clampsR-13 fiberglass insulation (Another dumb question: What's the best way to attach the insulation to the MDF?) NBL Wood-Backed cherry Veneer Sheets (Should I put polyurethane over the veneer?) Hide glue for attaching the veneerDouble edge veneer trimmerContact Cement Roller CoversWelborne Labs stranded copper 18 gauge speaker wire for hookup (Any idea how much I will need?)(2) 18" Economy speaker grills from Parts Express (any other, better looking options for grills?)(2) Large Grill Clamp Kit from Parts Express**Do I need screws for cabinet construction? If so, any suggestions?Maybe 5/16" dowels instead?**Any other items I may have missed, may need or would be helpful in my project?Jeff B
