My crossover is taken right from a calculator that used to be online:woofer 4.5L then 8.2C, tweeter 8.2C and then 4.5L. Never did find the Re and Le of the 806A but 16Ohm shunt with 32Ohm parallel with .47 cap goes to the tweet. Simple!18 gauge aircores and Solens from PE but the att cap is Auricap. Creating is more like performing than listening
