Couple notes; Home depress has maple sheets of 4x8 3/4 that look great on sale for 29\$ I took my cabs and mounted the front inset i/4" so that the face projects out 1/2". This gives me a 90% corner around the perimeter. The Depot sells this moulding called shelf edge that has a ninety % corner of 1/2x3/4 made of poplar that takes tung oil real nice. The edge stuff is decorative and gives a real pro look to the cab. I got the Idea off Yuichi's site. Just a note
