Dear Wayne, my uncle is crazy about karaoke, he and all his friend is going to karaoke twice a week, and he build his own 2 karaoke rooms, the room is rectangular and the size is about 6X12 meter (I plan to use Theater seven), and the karaoke room in the bungalow is 4X10 meter (I plan to use Thermionic six). I have seen the room and both have height about 2.5 meters. Can it works? And do you have any recomendation for subwoofer that F3 is 29Hz, but the size is about 2-3 cubic feet?Thank'sRegards,Gabriel
