Hey Don, On the HD15 design, wouldn't waste my time for one thing the horn path length is too short to get down to 50hz, and Rog has a note on there to use at least 6 of them and use an 18" or 21" drivers for the sub frequencies. To get the 50hz out of them they're just going to be acting like a sealed woofer cabinet anyway. HTH Bill W.
