Subject: Did I ever mention that Pi's are loud?

I think I'm playing my speakers way too loud without realizing it. Sometimes, when I'm sitting at work, or late at night, I can feel my ears burn and hum, like they do after a concert. And I'm usually at least 15 ft away from the speakers when I listen to them. I don't stick my head against them anymore. Learned that lesson quick enough. Guess that's one of the drawbacks of having speakers that are highly efficient and can take a lot of power without distortion ;-)
