
Subject: Adam, how big are your Kappa boxes?

Hi Adam, I have a couple of Kappa15A's I'm going to build someday and was wondering if you use those drivers or the LF versions? Also, what size box are you using? The Kappa's don't go real low in a Pi sized box. I'm looking at a 6 cu. ft. box tuned to 40Hz for about 45Hz 3db point. Thx,
Chris
