Subject: Re: help: pi alignmemt for JBL E155 (box & port) Posted by Wayne Parham on Thu, 04 Dec 2003 22:15:24 GMT View Forum Message <> Reply to Message

These drivers are really tuned for high-output output above 40Hz. They can be used below this frequency, but they aren't designed with specs that make them well-suited for operation in the 20Hz - 40Hz octave. Looks for drivers with more moving mass and a little bit higher Q.
