I think it sounds awesome !!! I really like the sound of it, very nice midrange to my ears. I will still look for that JBL driver though, perhaps it might be better still. Wayne, do you think I should cross at 2KHz because I have output up there? Or 1.6KHz? I was thinking, perhaps I should use a pseudo butterworth filter instead of the "standard" butterworth if I cross at 2KHz. (possibly pseudo for 1.6KHz xover as well...)What sort of range do your midrange horns with the 2012/delta cover?
