good news modeled the lab horn up the rear chamber is too large, but i can reduce it..+ i get slightly longer horn path length. Also I HAVE A JOB fulltime at 10\$.hr (nz \$) the minimum wage is 8\$ so im fortunate. i just have to work from 10pm -4am 5 times a week :P with my first pay check=SPL meter 20watt car amp Digital camera so u can see my projects properly. and lab12+ 320L 30hz horn.... :-)

homepage with 30hz expo
