Well...I really wanted to get the info first hand (from the guys who bought them) But my e-mail to him was kicked back. Ron, it sounds like your talking about the same 6cuft cabinets the other guy I know of bought. I can't remember what he ended up doing with them...I think he may have thrown them away. But who knows...maybe they're just shoved in a corner somewhere. JBL pro really has some nice stuff...and I'm sure the cabinets we're talking about do have an application...but you think they'd be a little more descriptive in their...well, description. ;) take care...and keep on hornin'!
