Subject: Sucks to live in cold climate

I am so jealous of people who live in climates that allow them to work outdoors, even in January. I have a pair of functionally complete 2Pi Towers that are partially veneered, but I have to wait until Spring when I can bring them outdoors to finish them. Guess I'll have to keep busy with projects on the electronic side. Just finished a chip-amp for my sister and I'm thinking of building two for myself to bi-amp the speakers.gar
