Wayne,Since it's not a bad day here in the NE, I got up early, opened up the garage doors and have been finishing a couple of projects. I feel like cutting something, so I'm making panels for Studio Two Pi Towers. Can I get a set of plans, please? ThanksAssuming this works, the attached picture shows an Adire Tempest sub nestled next to a Pi Theater 4 and Welborne electronics. Come spring, I'll wrestle the 4 Pis back to the garage and finish them!Bob
Tempest Construction Pix (w/ Pi 4 in last photo)
