Subject: Re: pi corner horn Posted by Dean Kukral on Tue, 13 Jan 2004 17:03:00 GMT View Forum Message <> Reply to Message

If I get this correct, then: This design permits you to use a higher crossover than with a Klipsch-type folded corner horn, doesn't it? Thus, you are able to use a two-way system with full compression horn loading above the woofer? (Avoiding the need of the "Holy Grail" midrange.)
