I really liked the old 2205's, but I also like the 2226's. I will say that the 2226 is generally preferred by folks that have a little power in the amps though. Even though the speaker is very efficient, the SET guys sometimes prefer other speakers. The 2226 tends to be more at home with amps over ten watts or so. Then again, I've used my little 2 watt Paramours with 2226's and I don't think there is a better combination.
