Subject: Audiophile Pi7 plans please

I recently heard a pair of Audiophile Pi7 speakers and I was just blown away. I'm told the only way to get them is by ordering the plans here. Can you send the plans to me please? Will you build them for me? If not, will you sell me the parts? I can find the JBL 2426H and the 2012H but not the 2245H. Do you carry these parts? Do you have the 2245H in stock?
