Subject: Theater seven pi corner horn Posted by CSHalle on Fri, 19 Mar 2004 13:59:25 GMT View Forum Message <> Reply to Message

Hi,I was wondering if the Theater seven pi corner horns would be a good option for me. I listen mostly to classical music (Mahler, Strauss, Schoenberg, etc.) and acoustic jazz. My dedicated listening room is only 204 square feet (17' X 12' X 7') - the room being located in the basement. I currently own a SS amp (Cambridge A500), but I'm planning to buy a pair of Paramour. I'm also dreaming of getting a pair of Edgar or Martinelli's wood horn. What do you think ?Thank you,CS Halle
