It's a mid-grade driver that was used in some of the tent sale systems that a lot of folks here bought. Everyone seemed to feel that it was a pretty good part, but not as good as the 22xx series drivers. That's second hand information though - I've never used the 2032 but this opinion seemed pretty unanimous from tent sale purchasers. So I think I'd be willing to pay \$150.00 AUD (\$112.00 USD) for a pair of good 2032 refurb.
