Wayne, After Ebaying for an long time, I got mixed up on my jbl numbers and have bid on 2425 drivers instead of 2426 as the plans call for. I can always use these for something, but will they work in the audiophile Pi 3-way as well as the 2426? I also wondered if the 2118 driver would work as well as the 2123? Thanks in advance, Russystems
