That is one big point i didn't see. But your right, i told i don't know lot about designing. But i do like the idea of one sub that pulls as much as 4 double 18" subs! If we assume the guys from prosoundweb tell the truth!The big problem for me tough is that their labsubs are so large and more build for larger scaled applications. I`m playing at gigs from 100 to maybe 500 man.Are there any more options, Anyone?Thanks,Erik
