Hi guys I have a pair of 2225's, and they're a good driver. But recently I found on eBay a pair of JBL 2226 drivers for AU\$550/pair + postage, and there's no bidders yet, ends in about 3 days. Assuming (hoping!) price doesn't increase to major amounts - Is it worth buying these 2226's and selling my 2225's? I know they're pretty similar, and both good. But I haven't used a 2226 before, so maybe somebody that has used both 2225 and 2226 can give their opinion. I'm just debating whether or not it's worth it. Who knows, maybe all the bidders will come in at last minute and push the price to \$1000, then I'll forget about it :p The 2226's on eBay have recently been reconed with original JBL recon kits.
