There are those 30 or so names.... some from down in Chicago, other one far away from my side of the state in Minnesota. I cut about 4 names that always come up bounced because the parties were not considering that my mail may not get through a company firewall. Goodbye to those. A fifth one received my monthly message and said that I have them on this list by mistake. It was one of those Mrs. and Mr email addresses...oh brother. That's like having an email address called

The Smiths@anywhere.isp You get the idea. In between I have made at least one message a month but there is little crosstalk. So I don't know what the future of activities might be. AudioRoundtable is on my desktop. I communicate with this list the most. And I promote the list when I do get a mail from somebody about speaker building.
