---

because I love JBL since 1975 (I'm sound maker an so Hammond organ player) now at 47 years I'm doing a collection of vintage JBL speakers professional (I've well known succes story of fabulous monitors 4310,11,33,50 and others still use in studio) I've bought SUB 4818, and they are often on the road with me and my blues band, 20 times every year for concerts!! I'm looking for informations because there is still in E155 JBL, and in good use! I use QSC amplifiers PLX 3002I think it will be possible to change this old but GOOD E155 by a new speaker... help me !!best regard ERIC
