Excellent components, but I have not listened to any TAD so hard to say. I do know I like the sound of the JBL 2425H on a 2344A significantly better than a 2445H on a 2380A. Thus, this is not the path I would go down. The 2425 is about half the price of the 2445. Horns are about equivalent in price (used prices).Dan
